-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --  
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## DETAILED ACTION

1. The amendments made to the claims by the Applicant have been considered, but do not overcome the prior art previously presented.
2. The following claim 1 is drafted by the examiner and considered to distinguish patentably over the art of record in this application, is presented to applicant for consideration:

A system for detecting and annunciating when a loss of occupancy detection in transit systems, such as a train operating on rails and controlled by an automatic train control system, goes undetected with said system comprising:

a first car in a train with an automatic train operation system which detects a speed command of a proceeding block;

an end car in a train with an automatic train operation system which detects the speed command of a trailing block while its control function is disabled;

a speed command comparison device to compare the speed command of the trailing block with known speed commands; and

an automatic train control system communicating with said speed command comparison device and a controller device that controls the reception or transmission of speed commands and formatting of a Global Position System receiver's output data, speed commands and decoded data received from said speed command comparison device whose data output is supplied to an optical transceiver, radio frequency transceiver, train line transceiver, or traction power transceiver for the purpose of

Art Unit: 3661

detecting and annunciating when a train whose presence should be detected and annunciated goes undetected and unannounced.
